

BPL will be just another excuse for why power companies will not clean up the RFI in their lines. Broadband will be their escape goat, placing all the blame on BPL. Also with all the RFI problems already out there in sheilded cables, what will happen to us ham radio operators when BPL comes through on unsheilded power lines. I can tell you. Our radios will receive so much noise, we will not be able to operate.  
Thank You. Doug Cline Pasadena Texas
